

RoHS Certification

To Whom it May Concern:

This certification is submitted as evidence of our commitment to product safety and legal compliance as applicable to homogenous materials.

Regarding the European Union (EU) Directive 2015/863 of the European Parliament and of the Council (amended several times) on the restriction of the use of certain hazardous substances in electrical and electronic equipment, we submit to you that Ta Chen International, Inc.'s products do not exceed the below maximum concentration levels by weight in homogeneous materials:

- **Cadmium (Cd)**: < 100 ppm
- **Lead (Pb)**: < 1000 ppm
- **Mercury (Hg)**: < 1000 ppm
- Hexavalent Chromium: (Cr VI) < 1000 ppm
- Polybrominated Biphenyls (PBB): < 1000 ppm
- Polybrominated Diphenyl Ethers (PBDE): < 1000 ppm
- Bis(2-Ethylhexyl) phthalate (DEHP): < 1000 ppm
- Benzyl butyl phthalate (BBP): < 1000 ppm
- **Dibutyl phthalate (DBP)**: < 1000 ppm
- Diisobutyl phthalate (DIBP): < 1000 ppm

As per the referenced directive, 'homogeneous materials' means one material of uniform composition throughout or a material, consisting of a combination of materials, that cannot be disjointed or separated into different materials by mechanical actions such as unscrewing, cutting, crushing, grinding and abrasive processes.

TKA does not have a RoHS 3 compliance letter. RoHS 3, adds four new restricted substances – all phthalates. The four phthalates are listed in TKA RoHS and REACH compliance letters and in the REACH.

Please do not hesitate to contact John Elsenheimer, Vice President TCI – Corp at <u>john elsenheimer@tachen.com</u>, with any questions or comments.

Sincerely,

TCI Texarkana Aluminum Management
